SUMMARY

MSc Business Analytics & Management Science graduate (Distinction) from the University of Southampton with over four years of combined experience in data analysis, business intelligence, and management consulting. Background includes three years analysing large-scale datasets and building KPI dashboards at Ubisoft, and six months delivering market research, competitive benchmarking, and strategic insight presentations at Blackmont Consulting. Comfortable working with SQL, Python, Power BI, Tableau, and Excel to translate complex data into clear recommendations for technical and non-technical stakeholders.

CORE COMPETENCIES & SKILLS

Business & Data Analysis: Data Analysis, Trend Analysis, KPI Analysis, Root Cause Analysis, Market Research, Competitive Benchmarking

Business Intelligence: Power BI, Tableau, Advanced Excel, KPI Dashboards, Stakeholder Reporting, Data Quality Assessment

Decision Support: Scenario Analysis, Predictive Modelling, Forecasting, Optimisation, Simulation Modelling (AnyLogic), Risk Assessment

Technical: SQL, Python (Pandas, NumPy), Relational Data Modelling (DBMS), ETL, JIRA, Confluence

PROFESSIONAL EXPERIENCE

Business Consultant Intern | Blackmont Consulting, UK (Remote)

Jan 2026 – Jun 2026

- Market Research & Strategic Consulting

- Analysed market trends and conducted competitive benchmarking across live client engagements to inform strategic recommendations
- Designed and delivered data quality assessments, ensuring alignment between client objectives, data integrity, and technical solutions
- Synthesised complex datasets into structured insight presentations to support senior leadership in strategic business decisions
- Prepared and presented client-facing deliverables communicating analytical findings and strategic recommendations to senior stakeholders
- Collaborated with project managers and cross-functional teams to deliver consulting outputs within project timelines

Data Analyst | Ubisoft, Pune, IND | Full Time

Jul 2022 – Jul 2025

- Gaming Analytics & Business Intelligence

- Analysed large-scale datasets (15M+ rows) using **SQL** and **Python** to identify performance trends, behavioural patterns, and operational inefficiencies across multiple product lines
- Built and maintained 10+ KPI dashboards in **Power BI** and **Tableau**, improving reporting efficiency by **35%** and supporting data-driven product decisions
- Consolidated data from multiple sources to support cross-functional decision-making, reducing manual reporting effort by **50%**
- Conducted exploratory and statistical analysis to identify root causes of performance issues and recommend improvement measures
- Worked with cross-functional technical and product teams to translate analytical findings into clear business recommendations

Data Analyst Intern | Kuber Enterprise, IND | Internship

Feb 2018 – Feb 2019

- Business Intelligence & Operational Reporting

- Cleaned and analysed operational data using **Python** and **Excel**, improving reporting accuracy by **20%**
- Built management dashboards tracking **8+ KPIs** to support data-driven business decisions
- Translated statistical findings into structured, stakeholder-ready reports to inform operational improvements

PROJECTS & ANALYTICAL INITIATIVES

- **MSc Dissertation – Market Saturation Analysis on Steam (MANG6545)** *2026*
 - Analysed 122,510 games released on Steam (2006–2025) using concentration metrics (Gini coefficient, Pareto analysis, Herfindahl–Hirschman Index) to quantify market saturation on a two-sided digital platform
 - Applied K-Means segmentation, multivariate OLS regression, and time-series cohort analysis to identify performance drivers and genre crowding patterns; developed a Genre Saturation–Opportunity Matrix for competitive positioning
 - Designed a breakout classifier (0.89 ROC-AUC) and an Attention Carrying Capacity model to produce actionable recommendations for developers, publishers, and platform operators
- **Northrop Grumman Innovation Challenge (University of Southampton)** *Mar 2026*
 - Selected from 80+ applicants; conducted rapid market research and competitive analysis using multiple data sources
 - Synthesised findings into a structured strategic recommendation and presented directly to Northrop Grumman executives
- **MedTech Innovation Programme (University of Southampton)** *6-Week Programme*
 - Researched real-world healthcare challenges and combined analytical insights with technical feasibility to propose a product solution
 - Authored a product feasibility report and presented the final strategy to an evaluation panel
- **BOSS Global Business Competition 2026**
 - Analysed seasonal market trends to forecast demand and optimise resource allocation across a simulated enterprise
 - Managed financial strategy including budgeting, capital structure decisions, and real-time P&L monitoring

LEADERSHIP & ACHIEVEMENTS

- **All India Rank 16 (ABU ROBOCON):** Represented college in national robotics competition (2017-18)
- **University Badminton Team Leader:** Coordinated training schedules, selections, and match logistics
- **Ubisoft UbiOlympics:** Secured 1st place in both Badminton and Carrom corporate tournaments

EDUCATION

MSc Business Analytics & Management Science (Distinction) | University of Southampton, UK *Sept 25 – Sept 26*

- Focus: Decision Analytics, Simulation Modelling, Risk Management, Data Mining, Strategic Management

Bachelor of Engineering, Information Technology | Mumbai University, IND *Aug 18 – May 22*

- Core Coursework: Database Management Systems (DBMS), SQL, Data Structures, Information Systems
